### **Vacation Placements And Internships**

In the part we have offered winter and summer intern schemes and our placement students are paid their travel costs each week.

The interns will assist one of our associates with their on-going compliance casework being undertaken, providing a unique insight into the legal and financial compliance world that is rarely observed by outsiders.

The senior associate will ensure that any particular interests expressed are considered when making the placement.

Interns also work with fellow placement students on a project designed to improve your presentation and negotiation skills.

Trinity encourages a "work hard play hard" approach and interns will find the time spent at Trinity rewarding and enjoyable.
